

DAY 06

WEEK 1

Topic: Prompt Engineering.

Takeaways

Prompt → he can talk with AI with proper communication.
 Types of Prompt → . System Prompt Vs User Prompt.
 (How to behave) Ask AI
 RTCFR Framework → Role, Task, Context, Fewshot, Response
 Reverse Prompting → will ask AI to create the prompt

Summary

Today they covered the Prompt engineering and the types.
 System Prompt → he can instruct LLM how to behave.
 User Prompt → asking AI tools to perform. Then
 understood RTCFR framework details deeply. And
 the meantime, I understood how to generate a prompt from AI
 using reverse prompting. Finally they covered the types
 of prompt chaining. one o/p → input to another.
 Reduce Hallucination

Today's Task

SUBMISSION STATUS	NOTES / REMARKS
☒ Submitted Task completed and shared	What did you learn today? What did you Understand the the Prompt background types and frameworks. Construct the prompt using RTCFR Framework and use of reverse Prompting
☐ Not Submitted Will catch up tomorrow	

Tick the box only when it's true. Lying to yourself is only a real failure.

Understood GitHub setup, deeply.
 via Code as well as jupyter desktop formats.

Prompt Engineering Exams completed, Answer sheet uploaded in to Github repository
